CONTENT ALIGNMENTS AND SHIFTS – Grade 3 *DRAFT***

<b>Grade 3</b>	
<p><b>Critical Areas</b></p> <p>In Grade 3, instructional time should focus on four critical areas:</p> <ol style="list-style-type: none"> <li>1. developing understanding of multiplication and division and strategies for multiplication and division within 100;</li> <li>2. developing understanding of fractions, especially unit fractions (fractions with numerator 1);</li> <li>3. developing understanding of the structure of rectangular arrays and of area; and</li> <li>4. describing and analyzing two-dimensional shapes.</li> </ol>	<p><b>Mathematical Practices</b></p> <ol style="list-style-type: none"> <li>1. Make sense of problems and persevere in solving them.</li> <li>2. Reason abstractly and quantitatively.</li> <li>3. Construct viable arguments and critique the reasoning of others.</li> <li>4. Model with mathematics.</li> <li>5. Use appropriate tools strategically.</li> <li>6. Attend to precision.</li> <li>7. Look for and make use of structure.</li> <li>8. Look for and express regularity in repeated reasoning.</li> </ol>

<p><b>Core Academic Standard (CAS)</b></p> <p><b>Bold/Highlighted portions</b> of the CAS indicate content that does not align to any existing GLE/CLE for any course or grade. This content should be included in the instruction and assessment for Grade 3 upon transition to the mathematics CAS.</p> <p><i>Note: The link(s) provided from the Illustrative Mathematics Project in the CAS column provide draft examples intended to illustrate and clarify the CAS.</i></p>	<p><b>Grade 3 GLE</b></p> <p><b>Bold, ITALICIZED portions</b> of the 2008 Missouri GLE indicate content that aligns to the CAS for Grade 3. This content should be included in the instruction and assessment for Grade 3 upon transition to the mathematics CAS.</p>
<p><b>3.OA.2</b> Interpret whole-number quotients of whole numbers, e.g., interpret <math>56 \div 8</math> as the number of objects in each share when 56 objects are partitioned equally into 8 shares, or as a number of shares when 56 objects are partitioned into equal shares of 8 objects each. <i>For example, describe a context in which a number of shares or a number of groups can be expressed as <math>56 \div 8</math>.</i></p>	<p><b>N2A3</b> <i>*represent/model a given situation involving multiplication and related division using various models including sets, arrays, areas, repeated addition/subtraction, sharing and partitioning</i></p>	
<p><b>3.OA.3</b> Use multiplication and division within 100 to <b>solve word problems in situations involving</b> equal groups, arrays, and <b>measurement quantities</b>, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem. (See CCSS Glossary p. 89, Table 2.)  <a href="http://illustrativemathematics.org/illustrations/262">http://illustrativemathematics.org/illustrations/262</a>  <a href="http://illustrativemathematics.org/illustrations/344">http://illustrativemathematics.org/illustrations/344</a>  <a href="http://illustrativemathematics.org/illustrations/365">http://illustrativemathematics.org/illustrations/365</a></p>	<p><b>N2A3</b> <i>*represent/model a given situation involving multiplication and related division using various models including sets, arrays, areas, repeated addition/subtraction, sharing and partitioning</i>  <b>A2A3</b> Using all operations, <i>represent a mathematical situation as an expression or number sentence</i>  <b>A3A3</b> <i>*model problem situations, including multiplication with objects or drawings</i></p>	<p><b>A2A5</b> Using all operations, <i>represent a mathematical situation as an expression or number sentence using a letter or symbol</i></p>
<p><b>3.OA.4</b> Determine the unknown whole number in a multiplication or division equation relating three whole numbers. <i>For example, determine the unknown number that makes the equation true in each of the equations <math>8 \times ? = 48</math>, <math>5 = \square \div 3</math>, <math>6 \times 6 = ?</math>.</i></p>	<p><b>N3B3</b> <i>use strategies to develop fluency with basic number relationships (9x9) of multiplication and division</i></p>	
<p><b>Understand properties of multiplication and the relationship between multiplication and division.</b></p>		

**MISSOURI MATHEMATICS CORE ACADEMIC STANDARDS CROSSWALK TO MISSOURI GLES/CLES  
CONTENT ALIGNMENTS AND SHIFTS – Grade 3 *DRAFT***

<p><b>Core Academic Standard (CAS)</b>  <b>Bold/Highlighted portions</b> of the CAS indicate content that does not align to any existing GLE/CLE for any course or grade. This content should be included in the instruction and assessment for Grade 3 upon transition to the mathematics CAS.  <i>Note: The link(s) provided from the Illustrative Mathematics Project in the CAS column provide draft examples intended to illustrate and clarify the CAS.</i></p>	<p><b>Grade 3 GLE</b>  <b>Bold, ITALICIZED portions</b> of the 2008 Missouri GLE indicate content that aligns to the CAS for Grade 3. This content should be included in the instruction and assessment for Grade 3 upon transition to the mathematics CAS.</p>	<p><b>GLE Shift to Grade 3</b>  <b>Bold, ITALICIZED portions</b> of these off-grade 2008 Missouri GLEs indicate content that aligns to the CAS for Grade 3. This content should be included in the instruction and assessment for Grade 3 upon transition to the mathematics CAS.</p>	
<p><b>3.OA.5</b></p>	<p>Apply properties of operations as strategies to multiply and divide. (Students need not use formal terms for these properties.) <i>Examples: If <math>6 \times 4 = 24</math> is known, then <math>4 \times 6 = 24</math> is also known. (Commutative property of multiplication.) <math>3 \times 5 \times 2</math> can be found by <math>3 \times 5 = 15</math>, then <math>15 \times 2 = 30</math>, or by <math>5 \times 2 = 10</math>, then <math>3 \times 10 = 30</math>. (Associative property of multiplication.) Knowing that <math>8 \times 5 = 40</math> and <math>8 \times 2 = 16</math>, one can find <math>8 \times 7</math> as <math>8 \times (5 + 2) = (8 \times 5) + (8 \times 2) = 40 + 16 = 56</math>. (Distributive property.)</i></p>	<p><b>A2B3 use the commutative, distributive and associative properties</b> for basic facts of whole numbers</p>	
<p><b>3.OA.6</b></p>	<p>Understand division as an unknown-factor problem. <i>For example, find <math>32 \div 8</math> by finding the number that makes 32 when multiplied by 8.</i></p>	<p><b>N3B3 use strategies to develop fluency with basic number relationships (9x9) of multiplication and division</b></p>	<p><b>N2B4 describe the effects of multiplying and dividing whole numbers as well as the relationship between the two operations</b></p>
<p><b>Multiply and divide within 100.</b></p>			
<p><b>3.OA.7</b></p>	<p>Fluently multiply and divide within 100, using strategies such as the relationship between multiplication and division (e.g., knowing that <math>8 \times 5 = 40</math>, one knows <math>40 \div 5 = 8</math>) or properties of operations. By the end of Grade 3, know from memory all products of two one-digit numbers.</p>	<p><b>N3B3 use strategies to develop fluency with basic number relationships (9x9) of multiplication and division</b>  <b>A2B3 use the commutative, distributive and associative properties for basic facts of whole numbers</b></p>	
<p><b>Solve problems involving the four operations, and identify and explain patterns in arithmetic.</b></p>			

**MISSOURI MATHEMATICS CORE ACADEMIC STANDARDS CROSSWALK TO MISSOURI GLES/CLES**  
**CONTENT ALIGNMENTS AND SHIFTS – Grade 3 *DRAFT***

<b>Core Academic Standard (CAS)</b>		<b>Grade 3 GLE</b>	<b>GLE Shift to Grade 3</b>
<p><b>Bold/Highlighted portions</b> of the CAS indicate content that does not align to any existing GLE/CLE for any course or grade. This content should be included in the instruction and assessment for Grade 3 upon transition to the mathematics CAS.</p> <p><i>Note: The link(s) provided from the Illustrative Mathematics Project in the CAS column provide draft examples intended to illustrate and clarify the CAS.</i></p>		<p><b>Bold, ITALICIZED portions</b> of the 2008 Missouri GLE indicate content that aligns to the CAS for Grade 3. This content should be included in the instruction and assessment for Grade 3 upon transition to the mathematics CAS.
<b>3.MD.8</b>	Solve real world and mathematical problems involving perimeters of polygons, including finding the perimeter given the side lengths, finding an unknown side length, and exhibiting rectangles with the same perimeter and different areas or with the same area and different perimeters.	<b>M2C3</b> <i>determine the perimeter of polygons</i>	<b>M2C6</b> <i>solve problems involving the area or perimeter of polygons</i>
<b>Geometry 3.G</b>			
<b>Reason with shapes and their attributes.</b>			
<b>3.G.1</b>	<b>Understand</b> that shapes in different categories (e.g., rhombuses, rectangles, and others) may share attributes (e.g., having four sides), and <b>that the shared attributes can define a larger category (e.g., quadrilaterals). Recognize rhombuses, rectangles, and squares as examples of quadrilaterals, and draw examples of quadrilaterals that do not belong to any of these subcategories.</b>	<b>G1A3</b> <i>compare and analyze 2-dimensional shapes by describing their attributes</i> (circle, rectangle, rhombus, trapezoid, triangle)	
<b>3.G.2</b>	Partition shapes into parts with equal areas. Express the area of each part as a unit fraction of the whole. <i>For example, partition a shape into 4 parts with equal area, and describe the area of each part as <math>\frac{1}{4}</math> of the area of the shape.</i>	<b>N1B3</b> <i>*represents halves, thirds, and fourths</i>	<b>G1C4</b> <i>*describe the results of subdividing, combining and transforming shapes</i>
<b>Grade 3 GLEs not included in Grade 3 CAS</b>
